better absorb course material and understand difficult concepts this is the companion workbook for the textbook principles of microeconomics each chapter features a wide variety of exercises ranging from basic multiple choice questions to challenging mathematical problems and case study scenarios the textbook pursues an integrative approach to modern microeconomics by critically reflecting on the main findings of economics from a philosophical standpoint and comparing them Educators to approaches found in the social sciences it adopts an institutional perspective to analyze the potential and limitations of different market types and highlights implications for the design of the legal system and business practices throughout in addition to traditional rational choice models important findings from behavioral economics and psychology are also presented principles of microeconomics focuses upon the material that students need to cover in a first introductory course it is slightly more compact than the majority of principles books in the canadian marketplace decades of teaching experience and textbook writing has led the authors to avoid the encyclopedic approach that characterizes the recent trends in textbooks consistent with this approach there are no appendices or afterthought chapters no material is relegated elsewhere for a limited audience the text makes choices on what issues and topics are important in an introductory course this philosophy has resulted in a micro book of just 15 chapters of which chapters 1 through 3 are common to both micro and macro and a macro book of 13 chapters examples are domestic and international in their subject matter and are of the modern era consumers buy ipods snowboards and jazz not so much coffee and hamburgers globalization is a recurring theme while this book avoids calculus and uses equations sparingly it still aims to be rigorous in contrast to many books on the market that simply insert diagrams and discuss concepts in a diagrammatic framework our books almost invariably analyze the key issues in each chapter by introducing a numerical example Essentials or case study at the outset students are introduced immediately to the practice of taking a set of data examining it numerically plotting it and again analyzing the material in that form this process is not difficult but it is rigorous and stresses that economics is about data analysis as well as ideas and theories the end of chapter problems also involve a considerable amount of numerical and graphical analysis a small number of problems in each chapter involve solving simple linear equations intersecting straight lines but we provide a sufficient number of questions for the student to test his or her understanding of the material without working through that subset of questions british economist alfred marshall 1842 1924 was one of the most prominent thinkers of his age on the For philosophy of finance and this
